SUMMARY

Versatile Software Engineer with 2 years of experience in backend development with working knowledge of AI/ML, and cloud infrastructure. Skilled in building scalable microservices, responsive frontends, and optimizing databases across AWS, GCP, and Azure. Proficient in modern DevOps practices, CI/CD pipelines, and both SQL and NoSQL systems. Passionate about creating performant, user-centric applications with clean architecture and seamless user experience

SKILLS

- **Languages:** Java, Python, JavaScript (ES6+), TypeScript, SQL
- **Web Development:** HTML5, CSS3, Bootstrap, Tailwind, Angular, React, Next.js, Node.js, Express, Flask, RESTful APIs, WebSockets, Spring Boot, Git, GitHub
- **Libraries and Frameworks:** NumPy, TensorFlow, PyTorch, Keras, Pandas, Matplotlib, Seaborn, PySpark
- **Databases:** MySQL, PostgreSQL, MongoDB, Redis, S3, Firebase, Redis
- **Cloud & DevOps:** AWS (EC2, Lambda, CloudFront), Docker, Kubernetes, GitHub Actions, NGINX
- **Data Engineering & Big Data:** Hadoop, Spark, Kafka, RabbitMQ

WORK EXPERIENCE

Full Stack Software Developer - Larsen & Toubro Infotech Ltd, Mumbai March 2022 – April 2023

- Led full-stack development efforts for enterprise-level web platforms supporting internal operations for NXP Semiconductors, utilizing the complete **MERN** stack to deliver robust, scalable applications.
- Architected and integrated modular backend services using Node.js and Express.js, reducing service response latency by **25%** through efficient asynchronous handling and caching strategies.
- Redesigned user interfaces with **React.js**, enhancing user experience and system responsiveness while ensuring compliance with accessibility standards (WCAG 2.1).
- Collaborated with UX teams and stakeholders in Agile sprints to define requirements and deliver MVP features across multiple iterations using tools such as **JIRA** and **GitHub**.
- Orchestrated seamless integration with **Adobe Experience Platform (AEP)** and external APIs to drive data enrichment and dynamic content personalization, improving campaign effectiveness by **40%**.
- Developed automated test suites and implemented **CI/CD pipelines** with **Jenkins**, ensuring reliable deployment and minimizing post-deployment defects.

Software Engineer – Relation Realtech PVT. LTD. June 2021 - March 2022

- Spearheaded the development and maintenance of highly responsive and dynamic web applications using the **MERN stack**, improving client-side engagement and usability metrics by over **30%**.
- Engineered modular, reusable React components to streamline frontend workflows and enhance maintainability.
- Built scalable and secure **RESTful APIs** with **Express.js** and **Node.js**, handling over 10,000 real-time data transactions seamlessly.
- Implemented **JSON Web Token (JWT)**-based authentication and role-based authorization, ensuring robust data security and access control.
- Collaborated closely with cross-functional teams to optimize database design in **MongoDB**, significantly reducing query response time and enhancing overall system performance.

PROJECTS

Full Stack AI SaaS Platform to Transform Images [LINK](#) Jan 2025 - Feb 2025

- Deployed an **AI-powered SaaS platform** with features like **restoration, recoloring, object removal, and generative fill**
- Hosted a secure authentication system using **Clerk** and integrated **Stripe** for credit-based payment processing
- Designed a **responsive and scalable UI/UX** using **Tailwind CSS** and **Shadcn**, ensuring efficient cross-device support
- Implemented **serverless functions** and deployed on **Vercel**, achieving **99.9% uptime** and continuous delivery

Real-Time Collaboration Dashboard June 2024 - Oct 2024

- Engineered a **real-time collaboration dashboard** with live **task updates, comment threads, and notifications**
- Integrated **WebSockets** and **JWT authentication** for secure real-time messaging and user session management
- Built dynamic components using **React.js** and developed RESTful APIs using **Node.js** and **Express.js**
- Implemented **role-based access control** and **activity logging** to maintain system integrity and auditability

Smart Health Tracker Jan 2024 - May 2024

- Developed a **cross-platform fitness tracking app** to log daily activities, health stats, and nutrition data
- Built **interactive dashboards** using **Chart.js** and integrated **RESTful APIs** for efficient data flow
- Utilized **MongoDB Atlas** for cloud data storage with **auto-backup and remote monitoring**
- Enabled **push notifications** and smart reminders to increase user consistency and goal tracking.

Airline Reservation System Sep 2023 – Nov 2023

- Developed a comprehensive **Airline Reservation System** for booking, managing, and tracking flights using the **MERN stack**.
- Designed an intuitive **React.js frontend** with dynamic search filters, booking forms, and ticket generation modules
- Implemented **Node.js** and **Express.js APIs** for flight schedules, seat availability, and secure passenger data handling
- Used **MongoDB** for storing flight details, booking records, and user profiles with schema validation and indexing
- Integrated **JWT-based authentication** for secure user login, with role-based access for admins and customers

EDUCATION

Northeastern University, Toronto, ON Aug 2023 - May 2025
Master of Science in Information Systems, GPA: 3.8/4.0

University of Mumbai, Mumbai, Maharashtra, India June 2017 - May 2021
Bachelor of Engineering in Electronics Engineering, CGPA: 7.40/10
