PROFESSIONAL SUMMARY

Full stack software engineer with 2+ years of professional experience building scalable ReactJS front ends and Node.js/Spring Boot backend services and APIs. Comfortable owning both sides of the stack from REST API design to responsive UI work with hands-on CI/CD pipeline experience (cut deployment time by 40%) and cloud deployment exposure across GCP, Azure, and AWS. Writes clean, well-documented code with 85%+ automated test coverage and has authored technical documentation and participated in code reviews to support cross-team collaboration. Comfortable working within Agile teams and eager to learn from senior engineers while contributing production-ready work.

TECHNICAL SKILLS

Frontend: React.js, Angular, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

Backend & APIs: Node.js, Express.js, Java (Core & Advanced), Spring Boot, RESTful APIs, MVC Architecture, FastAPI

Cloud & DevOps: GCP, Azure, AWS, Docker, Kubernetes, CI/CD (Jenkins, GitHub Actions), Git

Databases: PostgreSQL, MongoDB, MySQL, Oracle 19c (Advanced SQL & PL/SQL), Redis

Tools & Methodology: Agile/Scrum, Code Reviews, Technical Documentation, JUnit, Mockito

WORK EXPERIENCE

Full Stack Software Developer — Larsen & Toubro Infotech Ltd, Mumbai *March 2022 – April 2023*

- Optimized React component architecture and asynchronous loading strategies, improving frontend responsiveness of a customer-facing production application.
- Built and maintained REST APIs using Node.js, TypeScript, and Express, supporting analytics and ML workflows with clean, well-documented code.
- Engineered AWS-based CI/CD pipelines using GitHub Actions, cutting deployment time by 40% and enabling safe releases within Agile sprints.
- Achieved 85%+ automated test coverage using JUnit and Mockito; participated in code reviews and debugging to maintain production stability.
- Diagnosed and resolved production-level defects, collaborating cross-functionally to align system observability with product feedback.

Software Engineer — Relation Realtech Pvt. Ltd., Mumbai *June 2021 – March 2022*

- Architected JWT authentication and RESTful APIs (Node.js/Express/MongoDB) for a multi-user platform, ensuring compliance with data security standards.
- Implemented UI and performance enhancements across the MERN stack (React, Node.js, Express, MongoDB), driving a 30% increase in user engagement.
- Authored technical documentation for system architecture and API schemas, accelerating cross-team onboarding.
- Deployed containerized microservices using Docker to support feature modularization and reduce latency.

KEY PROJECTS

WealthAgent — Full-Stack Personal Finance Platform — *Next.js 16, React 19, TypeScript, Tailwind CSS, FastAPI, PostgreSQL, Redis, Docker* — [Link](#)

- Built a full-stack personal finance platform with a Next.js/React/TypeScript frontend and a FastAPI/SQLModel backend, featuring an interactive portfolio dashboard, budget tracking with real-time threshold alerts, and JWT-secured authentication.
- Architected an async background pipeline (Redis + ARQ) for automated transaction categorization, with Alembic-managed PostgreSQL migrations and the full stack orchestrated via Docker Compose.

Slack AI Invoice Bot — *Python, FastAPI, Supabase, Google Gemini 2.0* — [Link](#)

- Built an open-source Slack agent with a rate-limited FastAPI backend proxy against a Supabase/PostgreSQL database, demonstrating backend API design outside the core React/Node stack.

EDUCATION

Master of Science in Information Systems — Northeastern University, Toronto, ON | GPA: 3.8/4.0 | Aug 2023 – May 2025

Bachelor of Engineering in Electronics Engineering — University of Mumbai, India | CGPA: 7.4/10 | June 2017 – May 2021

PROFESSIONAL CERTIFICATIONS

- Oracle Database 19c — Advanced SQL & PL/SQL
- MongoDB Essential Training
- Microsoft SQL Server 2022 — Data Warehousing & Business Intelligence Toolkit (Power BI & Tableau)
